## MOBILE DEVICE MANAGEMENT

**MDM solution for iOS and Android tablet management**

iOS

Android

When a school sets for a massive use of mobile devices and a new approaches to didactics, it needs a solution for managing and controlling the technology behind it all. Helgi | Chimpa is the answer - compatible with iOS and Android and with any classroom network management software, based on a professional-level MDM (Mobile Device management), it provides teachers a powerful yet user friendly tool for managing the

day-to-day classroom activities, helping student to focus on the subject and preventing distraction and improper uses of the devices. Moreover, Helgi | Chimpa includes a comprehensive control panel for the IT manager and an application - Chimpa Bazaar - to manage the app, ebooks and contents sharing among the classroom, with full support for volume purchases.

## ChimpaTeach - The teacher App

A full set of powerful control, management and sharing tools to guide and supervise the classroom activities

## ChimpaLearn - The student App

With Chimpa tablets are a really useful investment, thanks to the comprehensive tools available for the teacher (classroom management) and the IT manager (school management)

## ChimpaBazaar - The App, eBooks and shared content repository

With ChimpaBazaar Apps, eBooks, web links, PDF and cloud-based documents (hosted on Gdrive, Dropbox and OneDrive) are available for the students, with a web store approach. License-based applications have a full Volume Purchase support, so that the licences can be deployed to the students devices while being owned by the school.

## School device management services Chimpa MDM

The Chimpa suite is based on a cloud application hosted by our datacenter. Chimpa is a MDM (Mobile Device management) specific for schools, and includes many security and management features.

## CHIMPA: the right App to manage the classroom devices!

How many times you asked yourself how to effectively use students devices, balancing the different needs of security, control and learning?

We're proud to introduce you Chimpa, an MDM (Mobile Device Management) solution bespoken for the school needs, able to manage iOS and Android devices at the same time, packed with control and management tools.

Thanks to Chimpa Teach - the teacher control panel, available as free app on the App Store or accessible via webapp on any device - the teacher can:

- create classes, change the students accounts and set the level of restrictions for single students, groups or the entire classroom.
- have a full control over the accessible applications, the web browsing and the activities of the students.
- send commands and share contents such as apps, ebooks, web links and documents stored on popular cloud services such as Gdrive, Dropbox and OneDrive.
- Distribute the chosen apps over the students devices.

### Single App Mode

The teacher can force any app to be launched on the student device, locking it on the foreground

### Restrictions

The teacher can set a list of various restrictions on the students devices, such as locking the camera or the dictionary

### App Whitelist

The teacher can choose a group of apps and hide the others from the students devices

### Showcase

The teacher can force a device to connect to a mirroring device via AirPlay (iOS only)

### Internet ON/OFF

The teacher can lock the internet access

### Push Web Link

The teacher can share any web link by pushing it straight to the students devices

### Whitelist configuration

The teacher can create a whitelist of URLs, and the students won't be able to browse the internet outside of that list

### Push Cloud Content

The teacher can share any cloud-based document by pushing it straight to the students devices

### Lock the devices

The teacher can completely lock the students devices

### Passcode reset

The teacher can remove or change on the fly any passcode locking the students devices

## Compatibility

### iOS

Chimpa MDM is compatible with any iPad running on iOS 9.1 or above

### Android

Chimpa Learn is meant to run on a wide number of Android tablets. Due to the high fragmentation of devices running on Android, it's almost impossible to develop a software fit for any kind of device. That's the reason why we have two different versions of Chimpa Learn for Android:

- ChimpaLearn K for Android KitKat 4.4 devices (CLK)
- ChimpaLearn for Android 5.0 or above (CLL)

## Recommended requirements

Display	2048x1536
Processor	2.3 GHz Dual Core
RAM	2Gb DDR3
WiFi	WiFi 802.11 a/b/g/n/ac
Bluetooth	4.0 or above
NFC	Yes
Camera	1.2 Mpixel
Operating System	Lollipop (5.0 - API 21) or above
Google Play Services	Latest version (> 7.8.99)

## Minimum requirements

Display	1024x600
Processor	1.2 GHz Dual Core
RAM	1Gb
WiFi	WLAN 802.11 g
Camera	1.2 Mpixel
Operating System	KitKat (4.4 - API 19)
Google Play Services	7.8.99
