SCREEN SHARE PRO

ScreenShare Pro is a mirroring, sharing and multidevice collaboration. The (perpetual) license allows activation the ScreenShare server app on the Android OS native to the monitors interactive and does not limit the number of device clients (Windows, MacOS, Linux, iOS and Android) that can be connected to it using the same WiFi network. Among the main functions, ScreenShare Pro allows to perform bidirectional mirroring (from server to

client and from client to server, in split-screen mode up to a maximum of 4 connected devices simultaneously), remote control of Windows, MacOS and Linux devices via touch input from the monitor - becoming a perfect solution for the wireless management of the interactive monitor - sending image, audio and real-time video from client to server, annotation on shared documents.

Mirroring from device to IFP (max 4 devices simultaneously)

Mirroring from IFP to device (max 1 device)

Monitoring and management of connections

Access via numeric PIN (standard) or alphanumeric (advanced)

Streaming through native protocols (AirPlay, Miracast)

File sharing multimedia, images and documents

Audio / video streaming in real time

Mirroring from monitor to device

Remote control of the content displayed on the monitor

Quick app download client for iOS / Android via QR code

The connection does not require access to Internet
